WORK EXPERIENCE

Cloud Infrastructure Engineer

Oklahoma City, OK

Chloeta

June 2025 – Present

- Deployed and maintained production Azure infrastructure including **Azure Firewall**, **NSGs**, **Log Analytics**, and **Microsoft Sentinel**; delivered enterprise-grade threat detection, centralized security logging, and network policy enforcement across cloud workloads
- Engineered multiple Azure environments using **Terraform IaC** — including a secure SFTP platform, a file-ingestion pipeline with **Blob Storage**, **Private Endpoints**, **Managed Identity**, and **RBAC controls**, and a Kali Linux penetration testing lab with **Azure Bastion** and subnet-level **NSG segmentation**
- Designed and built warehouse network infrastructure from the ground up using **FortiGate firewall** and **Aruba switches**; **engineered VLAN segmentation**, custom subnet architecture, and a **Tailscale VPN** overlay providing secure out-of-band remote management
- Authored IT department standard operating procedures and security policies; **developed CMMC Level 2 compliant cloud enclave documentation** including control implementation narratives, system security plans, and CUI handling procedures aligned to **NIST 800-171**
- Administered endpoint and identity lifecycle using **Microsoft Intune** and **IBM MaaS360**; provisioned and onboarded new users across workstations and mobile devices, enforced MDM security policies, managed application deployments, and performed **password resets and account management across Active Directory and Microsoft 365**
- **Delivered Level 1 and Level 2 help desk support** resolving hardware, software, and network issues across end-user environments; coordinated with ISP and third-party vendors for outage resolution, firewall reviews, and penetration testing engagements

Cloud Engineer

Remote, VA

Jefe Consulting LLC

January 2024 – June 2025

- Automated the deployment of high-availability cloud environments using **Terraform** and **GitHub Actions** to provision foundational resources for 10+ business-critical applications.
- Architected secure network foundations by configuring **Virtual Networks**, subnets, and **Network Security Groups (NSGs)** to isolate and protect traffic for 20+ production-grade servers.
- Modernized data tier architecture by migrating legacy VM-hosted databases to **Azure SQL Database** to improve scalability and performance for 5+ enterprise services.
- Secured application secrets and connection strings using **Azure Key Vault** and **Managed Identities** to eliminate hardcoded credentials for 15+ production applications.
- Established enterprise identity governance by managing users and groups within **Microsoft Entra ID** to enforce strict **RBAC** for 100+ internal employees.
- Monitored cloud expenditure and resource health using **Azure Cost Management** and **Azure Monitor** to reduce monthly operational spend by 20% across the tenant.
- Developed and debugged infrastructure scripts using **PowerShell** and **Azure CLI** to streamline **SSH** connectivity and resource management for 10+ development teams.

Store Worker

Tinker AFB, OK

DeCA – Defense Commissary Agency, Tinker AFB

April 2021 – January 2024

- **Operated NCR database systems on a DoD installation** for real-time inventory tracking; **demonstrated attention to detail and data accuracy in compliance with DoD operational standards**

- Troubleshoot technical issues with point-of-sale and inventory management systems; **identified root causes and implemented solutions with minimal operational disruption**
- Performed service operations on a DoD military installation, **maintaining high service standards and proactive resolution of operational issues in a security-conscious federal environment**

SKILLS

Cloud & IaC: Microsoft Azure (Firewall, NSGs, Sentinel, RBAC, VMs, SFTP), Terraform, Docker, Proxmox, Tailscale, Cloudflare Tunnels

Security: SIEM/SOAR (Microsoft Sentinel, Arctic Wolf), IDS/IPS, CMMC Level 2, NIST 800-171, KQL, incident response, vulnerability assessment, defense-in-depth

Networking: LAN/WAN, VPN, FortiGate, Aruba, VLAN segmentation, firewall rules, out-of-band management, TCP/IP

Identity & Endpoint: Active Directory, Microsoft Entra ID, Intune MDM, IBM MaaS360, Patch My PC, Microsoft 365, Windows Server (AD/DNS/DHCP/GPO)

Dev & Scripting: Python, Bash, PowerShell, Linux (Ubuntu, RHEL), Git

CERTIFICATIONS

CompTIA Security+ | CompTIA CySA+ | CompTIA PenTest+ | CompTIA Network+ | LPI Linux Essentials | Microsoft AZ-900

EDUCATION

Western Governors University

B.S. Cybersecurity and Information Assurance

M.S. Software Engineering – DevOps Engineering
